PARKINSON'S DISEASE
A genetic cause can be identified in approximately 10% of cases, mostly in younger onset patients.

- Soft voice, decreased facial expression
- Decreased jaw swing on the non-affected side
- Tremor, subtle decreases in gait
- Difficulty with handwriting
- Cerebellar ataxia
- Abnormal reflexes
- Autonomic dysfunction, including sexual dysfunction and erectile dysfunction

Medscape
Unleash the bold spirit of Jim Beam® Devil's Cut®, a premium bourbon with depth and complexity that comes from liquid extracted from inside the barrel wood.

HEAVEN CAN'T WAIT.

All great bourbons have a magic to them, an element of mystery. As bourbon ages and matures, a portion is lost from the barrel due to evaporation. Many believe it's angels claiming their dues. That's why we call it the "Angel's Share"—gone forever.
